

Intuitive Etheric Healing Medicine Music for the Heart with Nathali Abeynayake

Nathali is a certified Angels Reiki Master and has a strong connection to ancient shamanic traditions. She has over the last 5 years, spent time with and supported healers and facilitators from the UK and South America, re-discovering the healing capacity of sound, voice and sacred ceremony all of which she brings into her therapies.

The purpose of Etheric Healing is to support and facilitate a profound aura healing which harmonises body, mind and spirit. By working to clear and heal the etheric body and make an alignment through this healing one can really come in contact with their true essence, the merit of our divinity which in turn uplifts and initiates a deep healing process. Nathali uses sound, songs and mantras, point holding, and energy clearing with sacred feathers and smells. The Healing is done through creating the space for one's self realisation and alignment, the result is increased awareness and more inner peace.
